## Summary

As an Information Technology Developer at Global Logistics Service (GLS), I apply my Bachelor of Engineering in Information Technology and my skills in Python, PostgreSQL, and automation to create innovative solutions for the logistics industry. I have been working at GLS for four months, and I have contributed to the development and improvement of several applications and systems that enhance the efficiency, accuracy, and security of the logistics processes. I am passionate about using technology to solve complex problems and to optimize the performance and quality of the logistics services. I enjoy working with a diverse and talented team of IT professionals, and I am always eager to learn new skills and technologies that can help me grow as a developer and as a person.
